Many people need professional care but not in a hospital.

Private Care Center was created in response to a growing need: families across the UAE were seeking professional, trusted healthcare delivered at home.

Patients recovering from illness, mothers navigating pregnancy and postpartum, elderly parents needing daily assistance, and children with special needs all required structured care in the comfort of their own homes.

Families were struggling to find trusted, licensed care that was both medical and compassionate without the stress of clinical environments.

We established Private Care Center to meet that need. We provide licensed home healthcare services that support every stage of life from prenatal care and newborn support to elderly assistance, rehabilitation, and nursing care.
